PENNSYLVANIA DEPARTMENT OF AGRICULTURE

Organization and Services

FOUNDED in 1895, the Pennsylvania Department of Agriculture has been designated by the General Assembly to deal with the administrative, regulatory, and investigational problems affecting agriculture and its allied food interests. It is primarily a service agency and is charged with the enforcement of more than fifty State laws. The Department organization provides for cooperation with The Pennsylvania State University, the United States Department of Agriculture, the State Farm Show Commission, the State Farm Show Committee, the State Soil Conservation Commission and various agricultural organizations. Functions are carried out by an Executive Office and the following bureaus:

The Bureau of Animal Industry

The Bureau of Animal Industry is a regulatory body and as such it is charged by law with the prevention, control, and eradication of transmissible diseases of domestic animals and poultry. The Bureau is divided into six divisions and the work of these divisions is augmented by ten district veterinarians in various sections of the State.

The Laboratory Division conducts diagnostic tests for diseases of livestock and poultry. It aids practicing veterinarians in the diagnosis and recommends corrective measures. Examination of animals for the presence of Rabies, the testing of blood samples for Pullorum disease and for Brucellosis, constitutes the major portion of the Laboratory activities. Five regional laboratories have been established to be used principally in the diagnosis of poultry diseases.

The Meat Hygiene Division supervises the inspection in slaughter houses and has under its supervision forty slaughtering establishments that maintain full-time meat inspection service by a graduate veterinarian. It issues licenses to cattle dealers, slaughtering establishments, rendering plants, and community sales. This division is responsible for the enforcement of laws and regulations governing these activities.

The Miscellaneous Disease Division has under its jurisdiction the control, suppression and eradication of all communicable diseases of livestock and poultry with the exception of Brucellosis, Tuberculosis and Paratuberculosis (Johne's disease). Vesicular Exanthema in swine continues to be a problem in some States. To safeguard the swine industry in Pennsylvania, the interstate movement of swine for other than immediate slaughter is governed by the issuance of approved health certificates. Rabies, with the fox being the vector, is again causing some concern in Pennsylvania.

The Tuberculosis Division. The incidence of Bovine Tuberculosis has been reduced to 1/10 of 1 per cent, the lowest in the history of the Commonwealth. The regular program of systematic Tuberculin retests on all cattle in the State continues.

The Dog Law Division enforces the law requiring the licensing of dogs and providing for the protection of livestock and people from attacks of uncontrolled dogs; appraises and determines values of damages done by dogs; pays damages to owners of livestock and poultry.

The Brucellosis Division has the responsibility of the State's Brucellosis Control and Eradication Program. On January 1, 1955, 28 Counties in the Commonwealth were certified for Brucellosis; 12 Counties were completely tested but not as yet certified; partial testing under the area plan was being conducted in 22 additional Counties. On the same date, 84,316 herds comprising 1,049,256 cattle were under State-Federal supervision for Brucellosis disease control. During 1954, at no cost to the owners, 136,793 calves were vaccinated. Two mobile units made milk ring tests at 6-month intervals in 26 Counties during 1954.

The Federal Agricultural Research Service cooperates in all disease control and eradication projects conducted by the Bureau and pays the Federal share of indemnities to owners of Brucellosis and Tuberculin reactors. The Federal Agricultural Research Service now pays for the cost of area Brucellosis testing and calfhood vaccination.

The Bureau of Foods and Chemistry

This Bureau has two chief functions: The safeguarding of the public health through rigid supervision of the food supply; and the prevention of fraud and deception in the manufacture, distribution and sale of food and food products and materials used for agricultural purposes.

These functions are performed through enforcement of the General Food Law of the Commonwealth which protects consumers against adulterated, misbranded, harmful, deleterious, or unwholesome food. This statute is reinforced by special legislation applying to sanitary containers, bakery products, butter, carbonated and still or non-alcoholic drinks, coffee and chicory, milk and cream, eggs, fruit syrups, ice cream, lard, meat, oysters, sausage and milk sanitation (production and manufacture).

In addition the Bureau is charged with enforcement of the agricultural products laws covering fertilizers, feeding stuffs, liming materials, insecticides and fungicides, linseed oils, paints and naval stores. These laws are designed to prevent deception and to maintain standards and quality.

The Bureau regulates and issues licenses for the manufacture and sale of oleomargarine; it licenses and regulates egg-opening plants, bulk milk dispensers, carbonated beverage and still drinks plants, bakeries, ice cream plants and cold storage warehouses which are inspected regularly.

Manufacturers, importers, selling agents and ultimate users of feeding stuffs, fertilizers, liming materials for agricultural purposes, linseed oils, paints, putty, turpentine, and insecticides and fungicides are protected through periodical inspections and analyses of their products and by publication of results of analyses of the first three named commodities. Registration of feeding stuffs, fertilizers, liming materials, insecticides and fungicides is required, and licenses to sell the products are issued annually.

Information on charges for State Laboratory analyses on feeding stuffs, linseed oils and liming materials may be obtained by writing to the Bureau of Foods and Chemistry. The Bureau does not analyze soils; this is done through County Agricultural Agents whose offices are located in county seat towns or cities.

The Bureau of Markets

The Bureau investigates and assists in the marketing of farm products, chiefly fruits and vegetables, poultry, baby chicks, eggs and potatoes;

Compiles and distributes periodic marketing information;

Advises growers on transportation of agricultural products;

Assists cooperative associations and auctions;

Establishes standard grades of farm products and maintains inspection; licenses fruit, vegetable, poultry and egg inspectors;

Supervises operation of the Pennsylvania Official Egg Laying Test;

Administers the United States-Pennsylvania National Poultry Improvement and Record of Performance Plans, aiding the State's outstanding poultry industry;

Enforces the Fresh Eggs Law, the Apple-Potato-Peach-Grape marking laws; baby chick regulations, and issues licenses to dealers handling agricultural products.

The Bureau of Plant Industry

This Bureau places and enforces quarantines and carries on eradication campaigns against insect pests and plant diseases;

Makes investigations for the control of injurious insects and plant diseases, including field tests of insecticides and fungicides;

Tests agricultural and vegetable seeds for purity and germination and enforces the State Seed Law;

Enforces laws governing practices, disease control and housing of bees;

Inspects and certifies Pennsylvania nurseries and all dealers in and agents for nursery stock;

Inspects and certifies potatoes, corn, small grains, soy beans, tobacco, peppers and tomatoes for seed purposes;

Inspects orchards, parks, farms, and plant imports for injurious insects and plant diseases; plans and executes programs for the control and eradication of plant pests;

Maintains reference collections of insects, plant diseases, plants and seeds, and identifies specimens;

Cooperates with the United States Department of Agriculture in many phases of plant pest control, including Japanese Beetles, Gypsy Moth, Potato Wart, and with various State agencies in surveys and control of Oak Wilt.

The Division of Crop Reporting and Information

Assembles and disseminates essential statistics and facts pertaining to the agriculture of the State from monthly reports rendered by hundreds of volunteer crop correspondents, information which assists the producer in his sales and is of interest to all industries which deal with agricultural products;

Cooperates with the Agricultural Marketing Service, United States Department of Agriculture, in crop and livestock reporting and publishes summaries of the data, as follows: An annual "Crop and Livestock Report" giving county production and value estimates; semi-annual reports on the pig crop; quarterly reports of grain stocks in all positions; monthly National and State reports on crops, livestock, livestock slaughter, hatcheries, dairy and poultry products, and prices received and paid by farmers; special seasonal reports on potatoes, fruits, grapes, tobacco and truck crops; periodic reports on honey, maple products, potato stocks, grass seeds, and farm real estate, and occasional reports on turkeys, broilers, feeder-cattle, farm income and agricultural outlook;

Cooperates with the U. S. Weather Bureau and the Agricultural Marketing Service in compiling and releasing a weekly weather and crop report throughout the growing season; with the State Department of Internal Affairs and the Agricultural Marketing Service in compiling and releasing an annual report of manufactured dairy products; and with Federal and State agencies in compiling monthly livestock sales and shipping statistics;

Engages in special activities in furtherance of Pennsylvania agriculture, making surveys to obtain data as need arises;

Conducts Department's editorial and public information work, including publication of the Weekly News Bulletin, official organ of the Department.

The Comptroller's Office

Supervises the keeping of the Department's accounts; provides the Secretary of Agriculture with all accounting information necessary for the preparation of budget estimates, examines expenditures to determine that budget allocations are not exceeded; lapses budget allocations made unnecessary by discontinuance of programs; sees that positions conform to the classification and compensation plan; informs the Secretary of Administration of deviations from budget procedures prescribed by the Governor.

The Comptroller also processes requests for personnel changes and cooperates with the Department head but maintains relationships with the Governor's Office established by the Act of August 21, 1953.
